LORIOT App Datasheet

"Connect your Robustel R3000-LG to an enterprise-grade LoRaWAN network server in seconds."

The LORIOT application for Robustel R3000-LG Series gateways provides a quick and easy integration giving customers an off the shelf solution for building LoRaWAN® networks at a price/performance ratio that has not previously been available.

Loriot are one of the world-leading LNS (LoRaWAN Network Server) providers with an impressive catalogue of succesful deployments globally.
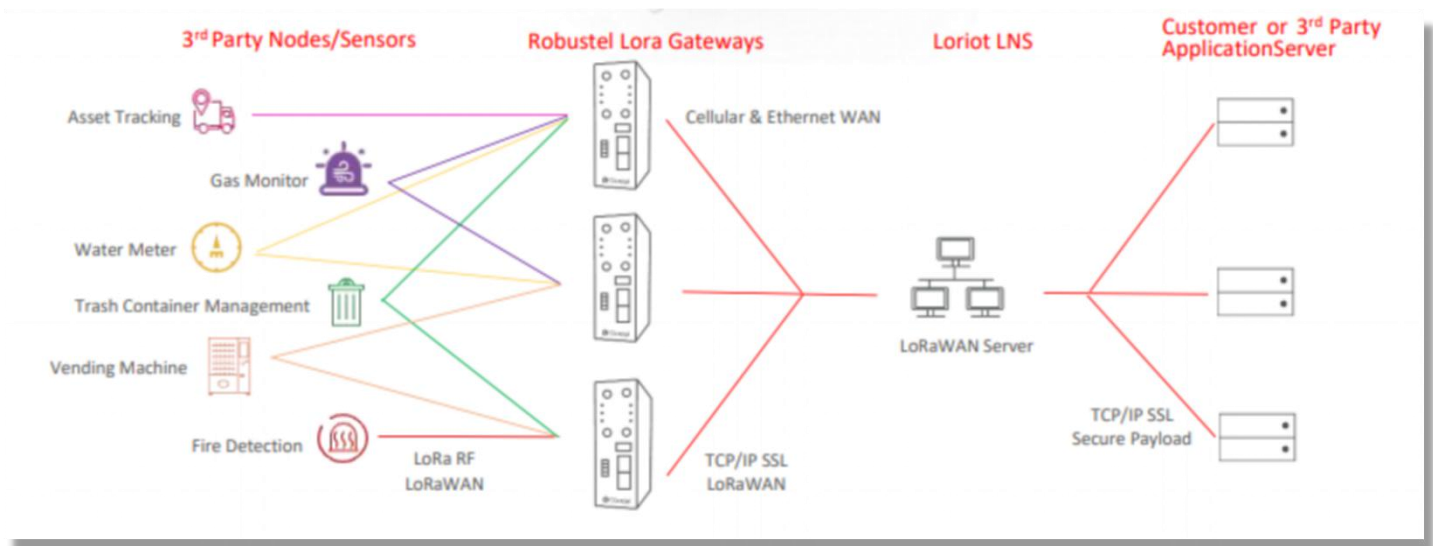

How does the LORIOT LNS App work?

Figure 1.0 - "LoraWAN stack enabled quickly & easily with the 'Loriot APP'"

As a very high-volume manufacturer of 3G/4G routers and gateways, Robustel have commercial advantages unobtainable by many of their peers in the LoRa® Gateway market and are consequently able to offer both Indoor & Outdoor Industrial grade, high reliability Gateways at very competitive pricing.

Using a tried and tested LoRa Gateway + LNS combination helps to significantly re-risk the building of new LoRa networks and provides piece of mind that the companies involved have significant prior knowledge of each other's products making effective and detailed technical support easier to come by.

The LORIOT App from Robustel can be preinstalled on R3000-LG orders, provided as an installation file by Robustel support or sent directly to devices in the field connecting to RCMS over-the-air.
